Live life to the maximum and achieve all your potential with BootSki.

STOLT is the Swedish word for PROUD. At STOLT of Sweden, we all grew up with a pair of skis on our feet. We have always loved the adventure and the thrill that downhill skiing has brought us. With that in mind, we simply had to take skiing to the next level and share it with those who love the thrill of skiing in the great outdoors. STOLT wants you to experience a new and exciting way to ski the slopes in a way you never could before.

The BootSki design was carefully developed to provide quality, maximum function, and flexibility to give you the skier the optimal experience.
